

## Theme for phptemplate on Drupal

To install template please follow instructions below:

- copy theme to the theme folder of your drupal installation
- login as an administrator
- go to administer- Site building- themes
- from the list of templates find the template that you need to enable
- set to enabled and default
- click save settings

In order to make site look like on our live demo you have to set blocks to preset regions. To do that login as as administrator, go to administer -> site building -> blocks and set blocks to positions listed below

Block name	Region	Sort order
Search	Right sidebar	1
User login	Right sidebar	2
Navigation	Right sidenar	3
Who's online	Right sidebar	4
